Ideation Phase

Empathize & Discover

Date	27 June 2026
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user’s behaviours and attitudes.

It is a useful tool to helps teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user’s perspective along with his or her goals and challenges.

Uses of an Empathy Map :

- Understands the user's needs and problems.
- Helps view the situation from the user's perspective.
- Identifies user pain points and expectations.
- Improves communication within the project.
- Supports designing better, user-centered solutions.
- Helps create products or services that satisfy customer needs.

EMPATHY MAP

SAYS

1. "I need my network request to be approved quickly."
2. "I don't know who is handling my request."
3. "I have already sent an email but haven't received any update."
4. "Can I track my request status online?"
5. "Why is the approval taking so long?"

FEELS

1. Frustrated because approvals are delayed.
2. Confused due to lack of status updates.
3. Stressed when urgent work depends on the network request.
4. Uncertain about whom to contact.
5. Satisfied when requests are processed quickly.

THINKS

1. There should be an easier way to submit network requests.
2. The approval process should be transparent.
3. I shouldn't have to repeatedly contact the IT team.
4. The organization should automate repetitive tasks.
5. My request should reach the correct team automatically.

DOES

1. Sends emails or fills out request forms.
2. Contacts the IT or Network team for updates.
3. Waits for manager approval.
4. Follows up several times if there is no response.
5. Keeps checking whether the request has been approved.

PAINS

- Manual request submission.
- Delayed approvals.
- No real-time request tracking.
- Manual task assignment.
- Poor communication between employees and the network team.
- Duplicate or missing requests.
- Human errors during processing.

GAINS

- Simple online request submission.
- Faster approval process.
- Real-time request status tracking.
- Automatic task creation.
- Email notifications for every stage.
- Better communication between users and the network team.
- Reduced paperwork and manual effort.
- Improved efficiency and transparency.
