Project Name	Automated Network Request Management in Servicenow
Maximum Marks	2 Marks

Customer Problem Statement Template :

The Automated Network Request Management in ServiceNow project focuses on simplifying and accelerating the handling of network-related service requests. By leveraging ServiceNow's service catalog, workflows, and automation capabilities, the solution eliminates manual bottlenecks and ensures requests are processed efficiently. End users can easily submit requests through a self-service portal, while automated routing, approvals, and task assignments streamline fulfillment. Where possible, integration with network automation tools enables end-to-end execution without human intervention. This results in faster turnaround, improved SLA compliance, and enhanced transparency for both users and IT teams.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel

PS-1					

Aspect	Description in context of our project
I am	We are ServiceNow developers and IT automation enthusiasts working on building an automated network request management solution.
I'm trying to	Build a streamlined way for users to submit network requests and automate the entire approval, fulfillment and notification process.
But	Currently, the process is manual and time-consuming, leading to delays, errors, and limited visibility.
because	Requests are routed through emails and spreadsheets with no automation, proper tracking or SLA compliance.
which makes	The solution valuable by providing faster request handling, improved accuracy, better transparency, and higher user satisfaction.
